

## COURSE SYLLABUS FOR DOCTORAL STUDIES

Name of the course	Field of study and its code	Faculty
<b>Scholarly and scientific communication: open access</b>	Communication and information S 008	Communication

Study method	Number of credits ECTS	Study method	Number of credits ECTS
		Consultations	2 ECTS
Individual work	5 ECTS	Seminars	

Course abstract
<b>Course aim</b> is to analyse the system of scientific communication, its development, understand intellectual property in scholarly communication, open access, and understand its meaning, analyse and evaluate the trends and practices of scholarly openness; understand and apply critical, analytical methods of scholarly communication audiences, scholarly communication goals, interested parties, assessment of scholarly communication report, presentation of scientific research results to different audiences by using different communication channels and principles of scholarly communication.
Course themes
Science Communication: Public Understanding of Science (PUS) and Scholarly Communication. Connections between the Public Understanding of Science and Science Communication. Development of scientific knowledge creation models. Linear scientific communication. Scientific communication in the network. Intellectual property in scholarly communication. Open access in scientific communication. Open access scientific journals, open access scientific archives, repositories, libraries. Open scientific data. The problem of reproducibility of scientific research (Crisis of Reproducibility): (Data-driven Replications). Open science. The ecosystem of scholarly communication: aim, communicators, audiences. Interested parties of scholarly communication. Scholarly communication report. Scholarly communication and risk communication. Scholarly communication and social media platforms.
Study methods
1. Individual consultations with course lecturers. 2. Individual studies of scientific literature and preparation of a scientific paper dedicated to the analysis of open access resources (on the topic of the doctoral thesis) or individual studies of scientific literature and preparation of a scientific communication report (on the topic of the doctoral thesis).
Evaluation methods
1. A scientific paper intended for the analysis of open access resources (the topic of the scientific paper) (5,000–10,000 characters) or preparation and presentation of a scholarly communication report (elective: a written report on public understanding of science – 5,000–10,000 characters; video, audio report on public understanding of science – up to 3 min. (a

multimedia report on public understanding of science can also be presented, the scope is determined according to the dominant medium); preparation and presentation of a scholarly report – a conference presentation (up to 10 min.).

2. An oral discussion by presenting and interpreting problems raised in the scientific communication paper.
