

## COURSE SYLLABUS FOR DOCTORAL STUDIES

Name of the course	Field of study and its code	Faculty
Digitization Technologies	Communication and information S 008	Communication

Study method	Number of credits ECTS	Study method	Number of credits ECTS
Lectures		Consultations	2 ECTS
Individual work	5 ECTS	Seminars	

Course abstract
<p><b>The aim of the subject</b> is to analyze the aspects of application and use of digital technologies in the fields of the research of the heritage, social sciences, and the humanities; to relate the application-directed knowledge with the broader theoretical and cultural contexts. Doctoral students are encouraged to apply innovative methods based on digital technologies in their doctoral research.</p>
<p><b>Content of the subject</b></p> <p>The history and trends of the development of digital technologies. Explication of the significance of digital technologies and their relationship with other forms/manifestations of media and technologies. Theoretical contexts of the application of digital technologies in the humanities and social sciences; the scope and objectives of the application of digital technologies. The impact of digital technologies The impact of digital technologies on HSM paradigms and their objectives.</p> <p>The technologies, hardware and software of registering, accrual and non-invasive research of the sources of empirical data (internet data semi-automatic accumulation technologies, infrared and ultraviolet photography, application of X-rays, GeoRadar, 3-D scanning, tacheometry, 360-degree photography, ultrafast cameras, etc.). Megadata. Application of crowdsourcing for the accumulation of data.</p> <p>Specific aspects of the storage of data of the humanities and social sciences in the digital environment. Issues of data structuration, standardization, recoding, interpretation, historical geography, chronology and storage of personal data in the digital environment. Metadata and paradata. Means of data storage in the digital environment (information systems, search engines and their networks). Development of digital collections, their management and information services. Archiving and storage in digital libraries and digital storage facilities. Management of digital information and the rights of intellectual property. Standards for digital archiving, the formats in use and general requirements. Methods of assessment of the quality of digital storage facilities. Data saving, copying and conversion.</p> <p>Digital means, methods and software applications of data research in the fields of the humanities and social sciences (view and sound filtering, 3-D data analysis, quantitative analysis of the content, mathematical statistics, data modeling, etc.). Megadata analysis. Application of artificial intelligence in the research of the humanities and social sciences. Experience of running and implementing digitization projects in Lithuania and worldwide. The fundamentals, key principles and trends in the projects on work digitization.</p>
<p><b>Study methods:</b></p> <ol style="list-style-type: none"><li>1. Individual consultations with the lecturers supervising the subject.</li></ol>

2. Individual research of academic literature and the preparation of an academic paper. The doctoral student selects the topic of the academic paper and bases its topic on the questions outlined by the Professor supervising the subject and the scientific advisor of the thesis.

#### **Methods of assessment:**

1. Academic paper (from 30 000 to 40 000 symbols including spaces) covering the connection between the topic and the thematic area of the student's doctoral thesis focusing on the questions posed by the Professor supervising the subject and the scientific advisor of the thesis.
2. Academic discussion on the basis of the academic paper of the student during the exam.
